

2020 ANNUAL REVIEW

Amid the chaos of 2020, the Boston Organics' community – staff, farms, suppliers and customers came together in truly meaningful ways. Our staff found purpose in the work of delivering groceries which helped people stay safe and minimize the spread of the virus. Channeling the power of our customers, we increased our food donations and doubled our purchases from local farms and businesses. In the spring of 2020, we joined the GrubMarket family. Boston Organics will continue its mission of building a healthy food system and using business to solve social and environmental issues.

+101

organizations supported with donated produce or vouchers:

+5,000
